

Key Features

- New integral sight glass is fused directly into a standard Glasteel® manway cover.
- Ideal for ultra-clean operation since there is no sight-glass mounting hardware to create pockets of possible contamination.
- Manway cover sizes available:
12" x 16", 14" x 18", 18" round.
- Interchangeable with original Pfaudler manway covers of the same size.
- FM approved for operation at 100 psig and 450° F.
- On-site polishing service for all sight glasses is now available. Contact the Pfaudler Service Department.

Pfaudler manway cover with integral fused-steel sight glass. Note smooth, clean exterior surface that results from eliminating the usual mounting flanges, gaskets, etc.

Cleaner Operation with Integral Sight Glass

When cleanliness is important, look into an integral sight glass from Pfaudler. Fused directly into a standard-sized Glasteel manway cover to eliminate the need for mounting hardware, this assembly presents a completely smooth interior surface that is essentially self-cleaning.

The integral sight glass provided in this assembly is the ultra-strong Pfaudler fused-steel sight glass, consisting of a pressure lens fused into the manway cover. The resulting composite not only handles the rated operating pressure and temperature, but is

highly resistant to damage from impact, thermal shock and scratching of the lens. Thus, it offers longer service life than tempered or safety glass lenses. For more information, request Data Sheet DS65-200-1.

Ordering Information

You can order the Pfaudler manway cover with integral sight glass by cover size, as follows:

Manway Cover Size	Assembly Part No.
12" x 16"	3156078
14" x 18"	3156082
18" round	3156086
