

KwikPlug™

Data Sheet DS83-205-2

Introduction

The KwikPlug is the latest addition of the Pfaudler glass repair family. Unlike other repair plugs that have a cure time of 72 hours at 70° F, the KwikPlug has no cure time. The KwikPlug is professionally installed, by a

Glasteel® Parts and Services service technician, with a specialized hydraulic compression tool kit. The installation process compresses the Tantalum disc into the PTFE gasket securing a better seal for longer life of the plug. Since no cure time is required for this new repair, the KwikPlug is the perfect solution for vessel start-up. Installation of the KwikPlug is fast and more reliable than the standard repair plug.

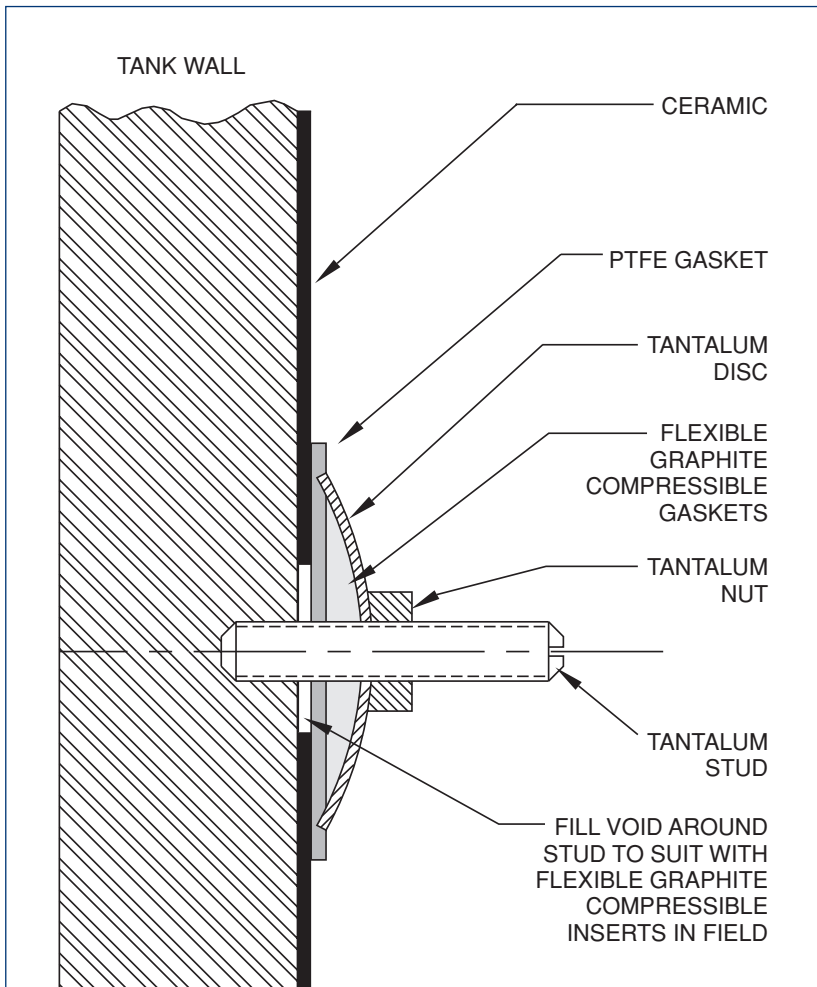

Features/Benefits

- No cure time required
- No F-Filler with 72-hour cure time

- Designed for emergency start-up and long-term reliability
- Professionally installed by GPS' field service
- Works with the Pfaudler Fault Finder detection system

Specifications

- Pressure rating: FV to 150 psi
- Temperature range of -200° F to 450° F
- Compressed flexible graphite for void filler
- Available in sizes 3/4 inch to 3 inch
- Patent Pending
